

E911 cheat sheet

Kari's Law

- Dial 911 with no prefix.
- Notify a staffed place, with callback and the location you have.
- A 9-911 habit can remain as a translation. It does not replace 911.

RAY BAUM'S Act §506

Dispatchable location: street address plus floor, suite, or room. Confirm scope and dates in the current FCC MLTS rules. This sheet is not legal advice.

Vocabulary

- ERL: a zone with one dispatchable location.
- ELIN: the callback number that represents that zone.
- ALI: database that turns the ELIN into an address.
- PSAP: the center that answers 911.
- Give a busy zone more than one ELIN.
- Callback to the ELIN should reach the phone that called.

On premises vs cloud

On premises: discover by switch port, subnet, or access point; send the ELIN. Cloud: civic address on the location; roaming clients refresh it. HELD (RFC 5985) queries a location server. PIDF-LO is RFC 4119. Test with the provider's test number, often 933, not with a live 911 call.

UC Lab field card · fictional examples only · confirm RFCs and current vendor docs before production changes.
